Exactly how I started a multi-million dollar business from my bedroom.

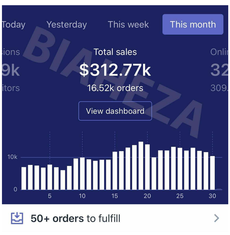
In this course I don't talk about regurgitated strategies that should work "in theory" and "mindset" like most. Instead we go through step by step and build a real live dropshipping store that does over one thousand dollars it's first full day of being live (profitable right from the get go). I explain everything along the way and talk about how I scale much further from there!

Latest course update: March 15, 2022

FEATURES OF THE COURSE

The main focus of this course is to help beginners build a store on Shopify and market it through Tik Tok ads. As Facebook ads got more strict, expensive and less effective, a lot of dropshippers have silently moved over to Tik Tok.

Due to the pandemic, people are more used to longer shipping times than ever. Combined with how effective and profitable Tik Tok ads currently are, I truthfully don't think there has been a better time to get into dropshipping.



This is the most revealing piece of content I have ever put out, as I even reveal some of my personal best selling products

My process for starting these stores is fairly similar every time, meaning you can use these exact steps to start your own
