PEOPLE STRUGGLE TO FIND JOBS.

Are you stuck in a job that doesn't make you happy, doesn't pay you what you're worth, and doesn't have any opportunities for growth?

Are you ready to make the jump to a new career that challenges you, pays you what you're worth, and offers you opportunities to grow while giving you the flexibility you need to live your life?

Whenever I ask people this question, the answer is an emphatic "YES!" However, most of them never end up making any progress.

Why? The answer boils down to one simple reason...

Everyone goes about the job search process the exact same way. Check this out:

In a recent LinkedIn survey on talent trends, 1 in 3 employees said they were actively looking for new work. The population of employed people in the US was 124 million. This means that, at any given time, **41 MILLION** people are actively searching for a new job.

But not everyone who applies gets the job. In fact, **less than 0.5% of people get hired.**

The other 99.5% are stuck in the vicious cycle of application, conversation, rejection, repeat.

I know all too well because I was one of those people. Part of the 99.5%.

HI THERE! I'M AUSTIN BELCAK, CREATOR OF THE DREAM JOB SYSTEM.

I've helped thousands of job seekers from different backgrounds and levels of experience land jobs they love applying online. Here are a few of the places where my job search strategies have been featured:

FASTCOMPANIES

A few years ago I was stuck in a job I absolutely hated. I was waking at 3:30am six days a week to be at work on time. My boss treated me like complete crap. I was making nothing and, as a result, I racked up over \$10,000 of credit card debt.

I had to get out.

I started applying online to 5 companies every day. Soon I had upped it to 10. I figured that if I threw enough applications out there, one of them would work out. I didn't even like the job or not because I would have taken anything that got me out of my current situation.

Not a single company got back to me. Not one.

If I finally made it to the interview phase (by dumb luck or through family friends), I was consistently told that they were moving forward with another candidate.

By the end I applied to over 100 jobs and didn't land a single one. I didn't understand why until months later...

It was because **I was going about the job search process like everyone else.**

The cookie-cutter strategies simply don't work.

It may sound crazy, but everything you've learned about getting a job in the past is wrong. It's a tough pill to swallow because we usually get advice from people we care about - our friends, families, and teachers.

Even the advice that so-called "career experts" give is completely off base. For example...

They tell us to "find our passion." **Wrong.**

They tell us that we need to "pay our dues" before we can move up. **Wrong.**

They tell us that if we "work hard" that everything will work out. **Wrong (what does "work hard" even mean in this context?).**

Then, after you've busted your ass and still haven't seen results, they tell you to try harder - send out even more resumes, apply to more jobs. **Wrong, wrong, wrong!**

The worst part is, we've been conditioned to take this advice as gospel. After all, it's the advice that our parents, our friends, and the "experts" all give. Who could blame you for thinking that you were on the right path?

Nothing is more frustrating than believing that you're doing everything right and not getting any results.

But what are you supposed to do instead?

INTRODUCING THE DREAM JOB SYSTEM

After spending several months following everyone else's advice, I decided to try something different. Thus, my personal mantra was born: **"Only take advice from people who already have what you want."**

I started by writing down the criteria for the career I wanted to have, the one I knew I deserved:

Working at a world class company
like Google, Microsoft, or
Facebook

Over the next 6 months, I found as many people I could that fit the criteria. I reached out to them and picked their brains. As I spoke to more and more of these top performers patterns started to emerge.

I began to see that these people weren't necessarily smarter than their peers. They just had a different approach. They completely ignored the traditional advice. Instead, they set their own rules for how the job search game should be played and it completely set them apart from everyone else.

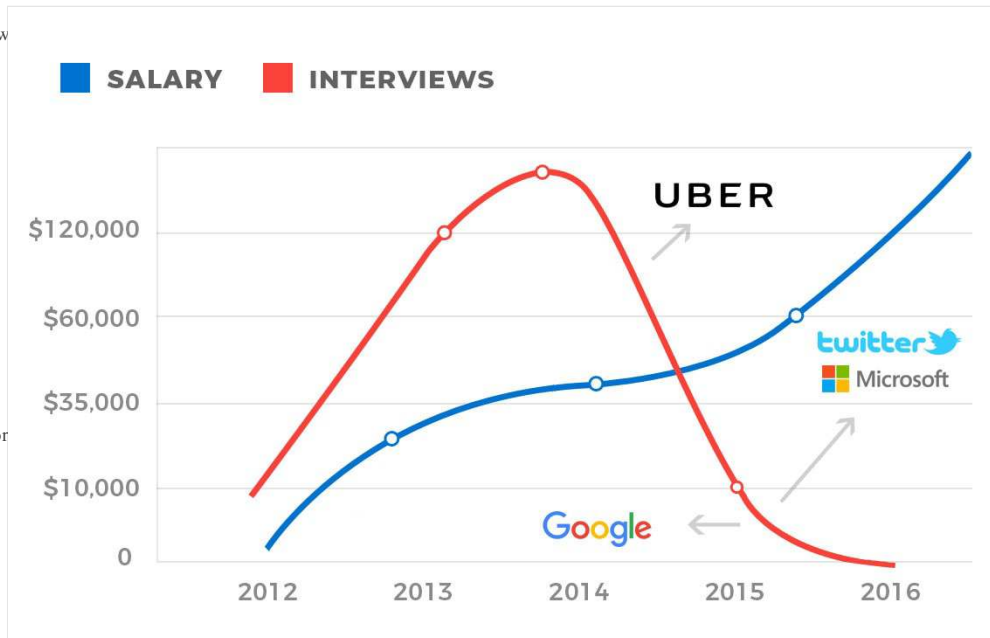

Making over \$100,000
Using the knowledge I gained, I developed a job search strategy that allowed me to go from a medical device salesperson making \$42,000 with 1 year of professional experience to getting interviews and offers from Google, Microsoft & Twitter along with a salary of \$160,000+ after being in the workforce for less than 3 years.

Hang on...did you catch that?

From \$42,000 to \$160,000+ in less than 2 years.

Check this out:

Living in a big city like New York or LA

Achieving these goals before age of 26

Before this system, I was applying for jobs like everyone else. I applied to over 300 jobs and the result was a marginal bump in salary.

After applying the Dream Job System, I was landing interviews left and right and my offer rate skyrocketed (along with my salary!). I was able to focus on companies that I wanted to work for and they were willing to pay me what I knew I deserved.

DOES THIS SOUND FAMILIAR?

You apply for dozens of jobs online, but never hear anything back (except for the occasional rejection)

You feel "stuck" in an underpaid job with no opportunity for growth, promotion, or development

You want to change industries but you feel like you don't have enough "experience" or that you're not "qualified"

You have no idea how to make "connections" or network with the right people (and you hate "networking events")

You just don't know what you want to do with your life or career yet

You feel like you're doing everything "right," following all of the expert advice, but you're still not getting any results

If any of those hit too close to home, it's time to take action. I'm going to help you break through that barrier right here, right now.

THE DJS PROCESS WORKS, HERE'S WHY

The Dream Job System is a proven, plug-and-play system that can be used across industries. I developed it by:

Applying to 300+ jobs and going on 50+ job interviews, A/B testing strategies throughout each part of the process: application, interview, salary negotiation, etc.

Taking social & behavioral psychology courses to understand how recruiters and hiring managers think in order to find loopholes that I could exploit.

Spoke to over 30 people who met my criteria: making \$100k+, lived in a big city, were under 25 (if they didn't have 5+ years of experience you don't need to either), had the flexibility to work anywhere.

This experience gave me a deep understand of the hiring process from end-to-end, and allowed me to develop a formula that actually gets results instead of following the be you're "supposed" to take. By the end, I knew:

Exactly what to put on my resume to make sure that it not only got read, but made recruiters excited to reach out to me

Build relationships with high profile influencers who referred me into roles and advocated for me throughout the entire interview pro

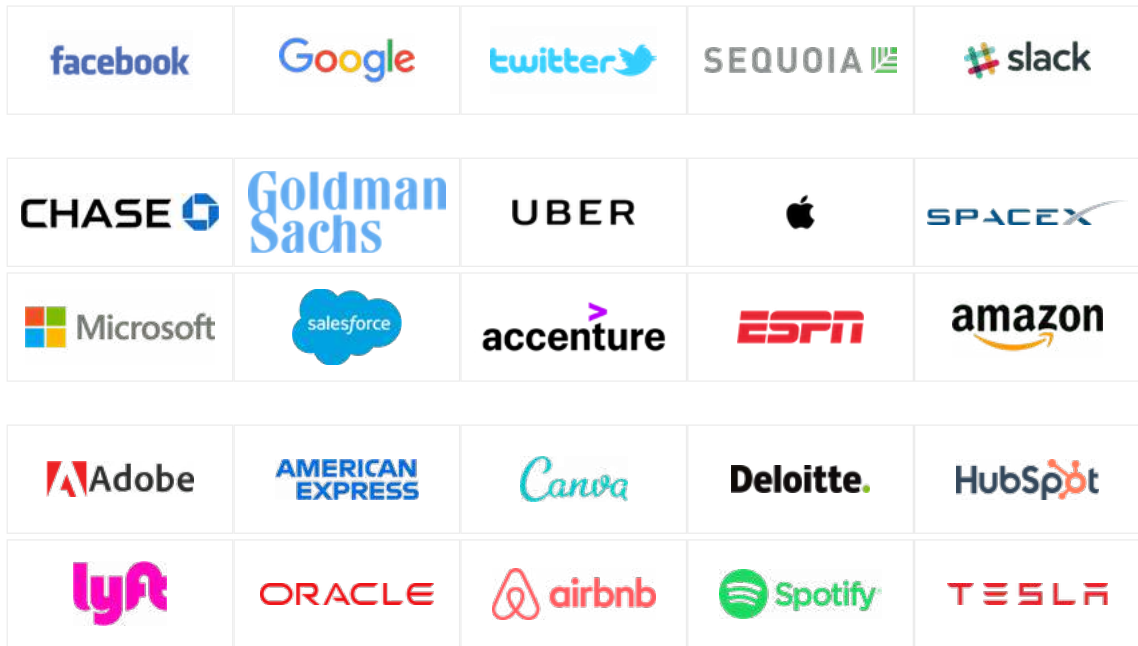

The exact answers I needed to use to make interviews love me – not only what to say, but when and how to say it

How to spin my non-traditional background as a HUGE advantage (I didn't have the "right" college degree, a good GPA, or industry experience. I was an outsider.)

Negotiation strategies that the best salespeople in the world use to close hundreds of millions of dollars of business each year in the mo competitive industries, which allowed me to increase my salary 200%+

These strategies haven't just worked for me either. I've coached people and helped them land interviews and offers at places like:

CASE STUDY: 6 WEEKS TO A DREAM JOB & SALARY

When Jared reached out to me he was living in DC and fed up with his current job. He was working as an individual contributor in customer service and had hit a ceiling. There was no more room for growth at his company and he was being paid way less than he deserved.

His dream was not only to change job functions and cities, he wanted to jump straight into a management role (with no prior management experience) AND score a raise when he was at it. Here's what happened:

“When I decided that I was going to move from DC to NYC and switch industry first time, I knew it was going to be hard. After reading Austin’s blog posts and about finding my dream job, I promised myself that I wouldn’t throw my resume the black hole of applying online.

I used Austin’s awesome scripts to reach out to people in my desired industry & more about what challenges they faced. This preparation led me to accepting a job. In fact, at the end of the process, my interviewers literally said “We’re not this level of preparation from our candidates...I haven’t seen this in 10 years of interviewing!”

After 6 weeks of this process, I ended up with two offers at higher salaries than previous job without “applying” online once.”

CASE STUDY: FROM LAID OFF TO MARKETING DIRECTOR IN 17 DAY

Paula is an immigrant from Brazil who had made her way to the US and was working at an SEO agency. The job was OK, but Paula didn't feel like her work truly made a difference in people's lives. She wanted to work at a company that prioritized tackling humanitarian issues as well as profitability and she felt stuck.

After we met, Paula flawlessly executed the DJS process to land her dream job at a company that sold water bottles for every bottle sold, provided 5 years of clean water to people in developing countries.

Paula worked at this company for a few months before taking her first vacation. When she got home, she found an email from her boss that said "we need to talk." The start-up was having funding issues and the CEO was laying off the entire workforce. Paula's last day was 3 days later.

While the situation was stressful, Paula already knew what she had to do. She took the same strategies she learned from DJS to get her name out there and land a job as a Director of Marketing less than 3 weeks later. Here's a quick video of her story:

“You’re probably wondering why the heck I’m making a video of myself...It’s because I need to recommend Austin Belcak. After Austin and I started working together, I landed a job as a Senior Business Dev Manager.”

JOSH

Senior Biz Dev Manager at WalkMe

<https://www.youtube.com/watch?v=CCylzqeINQI>

“Austin changed my life. I was a firefighter with no degree working two blue collar jobs. Austin helped me make the jump into software sales a \$10k raise despite having no ‘traditional’ experience and no college degree.”

SAM

Sales Development at SalesLoft

“All of the insights that Austin offered paid off 8x in the first year alone. If you’re wondering whether or not this investment will be worth it, in your shoes making the same decision. Trust me, it’s absolutely worth it.”

Austin

Senior Financial Consultant

“I can’t express enough gratitude to Austin for the impact he has had on my career growth! His advice helped me SKYROCKET my career development. Following his strategies, I landed back-to-back six-figure dream jobs!

Both hiring managers told me other candidates were more qualified and had more experience, but they were blown away with how I proved my value and ability to do the job before I got the job.

As Austin says, if you're depressed and sick of the online job application game, STOP doing that and START following his proven step-by-step formulas."

JARED

Head of B2B Marketing at rewardStyle

"I used Austin's advice to meet individuals at the company I wanted to work for and gain a referral that got me a call back and an interview just 2 after being referred. I used Austin's interview preparation techniques to rock my interview, and I was offered a position as a front end developer t for my first choice company."

RICK

Front End Developer at Red Ventures

"I was totally lost after college. I was stuck in the finance world and absolutely hated it. I wanted take my business background and apply it to the but literally no one would get back to me.

BEN

COO at Choice Fine Art

“Within a matter of weeks following the course the number of responses from cold-contacts I was getting easily doubled (if not more), the number of interviews scheduled skyrocketed, and the quality of the interviews was noticeably improved.

Ultimately, following the DJS system led to a job doing something I'm passionate about working with clients and colleagues I really enjoy, all while netting a \$5,000 (read “\$15,000” based on my new cost of living) salary increase and working significantly fewer hours.

The return on investment alone (\$500 upfront cost for a \$5,000 return= 1000% ROI) makes this course worth every penny, and that's not even accounting for the tremendous lifestyle difference and joy I have from having a job that I look forward to doing all while having more time to spend with my family!”

DAVID

Senior Account Director at dig

Austin's strategies helped me land 3 job offers in 3 weeks! The original offers I got were lower than I was expecting. I used Austin's salary negotiation techniques and ended up getting a 30% salary increase AND a \$5,000 dollar bonus!

CHRIS

Executive Director at Capital Analytics

I was trying to make a switch from my current job and was worried about being on student visa. Austin's material helped me land two job offers in 3 months, as well as negotiate my compensation up an additional \$17,000 from the first offer. This is one of the best investments I have ever made.

ANKITA

Data Analyst at Jefferson Health

Deciding to work with Austin was the best decision I've ever made. I followed his career guides when I had to relocate from the US to Indonesia and didn't lose touch with my network in Indonesia after living abroad for 3+ years.

With Austin's actionable advice, I managed to reconnect with my former managers and they referred and vouched me for several positions in big tech companies.

SHABRINA

Digital Marketing Manager at Mindshare

“Austin helped me make the transition from finance into a Program Manager role at Amazon. The new role came with a \$275,000 compensation package — a 30% increase over my previous salary.”

AMISH

Program Manager at Amazon (*Amish asked me to use a pseudonym)

“I lost my job due to COVID-19 and decided to pursue a new career path. I found Austin’s tools and strategies and decided to dedicate myself to implementing his job search system. Austin helped me land a role at a Fortune 500 company with a non-traditional background and a 39.5% salary increase.”

SANCHITA

Designer Engineer at Boston Scientific

I am so glad that I bought Austin's DJS course, as **it helped me land a great job in a field I had minimal experience in.**

It is a rationally structured collection of high quality material and resources for every aspect of the job search — figuring out what you want to do, growing your experience, crafting top notch resumes, interviewing, and negotiating salary. You are also introduced to non-traditional, highly-effective methods for landing a job, such as making connections from scratch within a company and landing a referral from within (yes it is possible, I did myself!). You also get access to a supportive community of people with the same goals. Keep in mind that the course is not a silver bullet. A lot of work and effort is required in the job search, but **if you follow the DJS system, you know you are attacking your problem with the best information and methods available!**

IOANNIS

Python Developer

I was laid off in March of 2020 due to COVID-19. At the time it was the best job I had been in since I graduated college, which made it that much more devastating. Like most people when they initiate their job search, I began applying to dozens if not hundreds of positions online. However, it quickly became clear that I was going nowhere fast.

So, I took to LinkedIn and started networking by blindly reaching out to connections that I had gathered over the years. Throughout this process I came across one of Austin's posts regarding his philosophy when it comes to landing your "dream" role. After some serious research and guidance from himself, I decided to take the plunge and sign up for the DJS course.

One of the things that stood out the most about the DJS system is how Austin stressed that the whole process is simply just a numbers game. It's a bit more complicated but at the end of the day, you do need to put in the work; which I clearly had the time for. That said, after pursuing over 120 opportunities, reaching out (cold) to over 1000 people, and participating in 80+ interviews (informational and actual) I finally landed the role I was looking for.

I am now a customer success manager for a prominent software/technology company and will be making more money than I ever have before (at 15% increase from my previous role). If it weren't for Austin's course, this door would have never been opened and for that I am so happy I decided to become a DJS member.

COLE

Customer Success Manager

I was doing OK in my consulting business, but incoming client work was inconsistent. One of my clients was giving me some basic projects, but wanted to do higher-value work for them.

I'd been a subscriber to the Cultivated Culture newsletter for over a year, so I had heard Austin talk about Value Validation Projects many times. I saw an opportunity with my agency client to do just that. I provided them with a proposal idea for unsolicited work. The agency president told me he was "blown away", and this would help them land new business with their client.

I just landed two new contract projects with that agency, just the type of work I was seeking. I emailed Austin to express my gratitude. Austin and Cultivated Culture share ideas that are highly valuable and applicable regardless of what kind of transition you're managing. I recommend him to members of my networking groups frequently.

DANIEL

Creative Director

I wanted to write a quick blurb for Austin talking about the incredible work he's doing at Cultivated Culture and how his content helped me find a job after being laid off due to Covid-19.

I was applying online and having several friends / connections refer me to different roles, but NONE of it worked. I received countless automated responses saying they "didn't want to move forward with my application." I was demoralized and completely out of sorts. I didn't know what to do but that I found Austin.

I came across his LinkedIn profile which led to reading as many articles as I could on his website and then ultimately purchasing his Dream Job System Course. I was hesitant to purchase the course due to the cost, but let me tell you, it was the BEST investment I have ever made on myself! Austin's content is pure gold!

Austin knocked my socks off with his job search approach and strategy and once I got things rolling, **I immediately started getting results. I had several interviews lined up, and had recruiters reaching out to ME via LinkedIn multiple times a week!**

Without Austin, I wouldn't be where I'm at right now. If you're having a difficult time landing a career you love or simply not having any luck landing interviews, Austin is your guy!

BECKY

People Operations at Masterclass

I had the great privilege of stumbling across Austin Belcak's LinkedIn page a few months ago. The timing was serendipitous as I had just started for a new job, but was dreading the endless applications on job boards.

As I was working full time and newly enrolled in grad school, I lacked time to send out mindless job applications. Immediately, Cultivated Culture caught my attention. My greatest challenge was to enter a space that was very popular and oversaturated with applicants. You see, I had my eye on a particular company that was growing at a rapid pace in Canada and I found it exciting.

Using Austin's very effective strategies, I was able to get interviews not only at my first choice of companies but several others. I gave start perfect interviews and negotiated a higher salary. It sounds a bit too good to be true, so I admit I started with a bit of skepticism. However, if you truly want to make a change, you really need to try Cultivated Culture methodologies.

Going through the content I felt like I was being guided by a trusted friend and mentor. It is not a simple fix to finding a job, it truly changed how

Going through the content, I felt like I was being guided by a trusted friend and mentor. It is not a simple task of finding a job, it truly changed how I viewed networking, building connections and getting my choice of a rewarding new role.

Thank you Austin for your amazing content and personable approach to guidance. I highly recommend working with Austin, it will completely change your perspective.

ZARWAH

Technical Program Manager

I can't say enough great things about Austin Belcak and his Dream Job System! I found myself unexpectedly laid off a few months into the pandemic.

My career path was not a typical linear trajectory and I was looking for support in navigating my job search at a time when jobs were scarce and "age" could be an issue. I had been following Austin on LinkedIn and Instagram and found him to be so down-to-earth, incredibly smart, and always providing amazing advice. After attending his webinar on the DJS, I decided to invest in myself and joined!

DJS is the gift that keeps giving! I was able to work my way through a series of modules that walk you through everything from identifying what is important to you, to targeting your top companies, to networking, resumes, interviewing, salary negotiation, and the key to it all — a Value Validated Project! The monthly virtual group meeting with Austin was fantastic and gave me the opportunity to ask questions, get advice right from the "source"

and also interact with other DJS job seekers...In the end, it was Austin's unwavering support during my arduous job search that gave me the encouragement and confidence to continue. His help and input on creating VVPs was invaluable. The DJS resources alone are well worth the price, but the personal access to Austin and the DJS community puts its value over the top. I just started a new marketing job, but in a new industry with an opportunity to focus on the customer, **making \$35K more in salary, plus bonus, plus extra week vacation!** I am so excited! I highly recommend DJS if you are feeling overwhelmed by the job search process and need resources, accountability, and support. DJS is a great investment in yourself and your goals!!

Take DJS Risk-Free!

I promise that this system will work for you. I've already mentioned that students who put in the work and do the work have gone on to land jobs at the world's best company.

I guarantee that taking this course and following through on the steps inside will increase the number of interviews you land and the amount of job offers you receive.

As a result, Dream Job System is backed by a full 30-day, money back guarantee. If you **do that** (that's bolded on purpose!) and don't begin to see results within 30 days, I will refund you even if you haven't started. To reiterate, this course is for people who take action. If you don't take action, no system you're going to work. To that end, we don't offer refunds to people who say "I didn't have time" or "I wasn't logged in." If you don't have the time to invest in your future right now, please consider that before signing up. But if you're ready to take action and you do the work, I guarantee your results! Note: If you are buying this course because you want a magical pill that will do the work for you, this course is not for you. Job searching requires a lot of work. A lot of commitment. A lot of persistence. If you are lazy, don't buy this course. I actually require that you do work to be eligible for a refund. If you request a refund for the course, you must submit a few basic assignments to show that you've given it an honest effort. If that isn't something you're cool with, we understand. This course probably isn't a good fit for you. We want to fill our community with people who are ready and willing to invest in themselves. [Click here to read all of the details on this policy.](#)

MORE DJS SUCCESS STORIES FROM PEOPLE LIKE YOU

"Austin's advice helped me successfully navigate 5 interviews at Facebook which resulted in an offer for a position as a Client Solutions Manager, a big pivot from my current job as a management consultant!"

JEN**Client Solutions Manager at Facebook (*Jen asked me to use a pseudonym)**

“I was looking to switch industries, but unsure of how to successfully market myself. Austin helped me reframe my thinking & realize that my non-traditional background was, in fact, an advantage. His course also helped me tremendously as I prepared for interviews; I learned how to ask the right questions about roles and companies and how to tell stories that convey my skills. **Shifting into a more positive mentality and learning how to talk about my experiences landed me the job I previously thought I was unqualified for.**”

ABBY**Business Development at Square**

“I landed a job as a Jr. PM. For a bit it looked like I might have had to settle for a \$15k/year cut, but **with Austin’s help I scored a \$5k/year raise** on my new job is letting me work from home with the exception of the first four work days per month, when I will fly out and work face-to-face with the client.”

MASON**Project Manager at Virtustream**

“Thanks to Austin, I landed jobs at Amazon and Apple!”

ABHISHEK

Engineer at Apple

“Austin’s advice got me my dream job at Reddit.

I was a senior in my second-to-last semester of college, worried about what I was going to do after I graduated. Like many others, I felt hopeless in my job search because I knew there were hundreds of other people who were applying for the same jobs I was – and many of them were far more qualified than I was.

I had submitted my resume to a few companies but it felt like I was just sending them into a black hole. If I did get a response, it would be the generic “Thanks for applying, but unfortunately...”

One day, I stumbled across Austin’s site. I vigorously read through most of his

articles, signed up for DJS, and started applying his methods. Thanks to him, I started conversations with some wonderful people at companies like Google, Facebook, Genius, & Reddit.

Through these conversations, I was able to get clarity on the kind of work I am good at/want to do as a career. I also received insightful industry advice from these talented and successful people in fields/companies that I aspired to work at. Through Austin’s process, I was able to secure a job at my dream companies: Reddit.

I’m truly thankful and forever grateful for having stumbled upon Austin’s course, it’s truly changed my life. I’ve passed along his resources to all my friends who have also been looking to secure jobs and work at companies they admire because I really believe in his advice!”

NICOLE

Brand Success Coordinator at Reddit

“My goal was to return to the technology and marketing field after freelancing for 2 years. Thanks to Austin, I got an offer at my top choice job within a month. The initial offer I got was good, but **Austin’s salary negotiation tips helped me get a \$10k increase**. I’m super excited to start my new job!”

TANYA

Solutions Engineer

I was always under the impression that I need to only state clear facts from my experience to get a job, and that I should be okay with whatever a company was offering me.

Cultivated Culture has been a game changer for me with absolutely fantastic resources that helped me enhance my interview prep beyond imagination. I can totally vouch for all the interview prep resources right from the step by step process of formulating a response to exact answers Austin himself uses. They’ve encouraged me to proudly share my life experiences with recruiters and highlight my value and impact. And the best thing!?! **I managed a 90% hike on my new role, using the negotiation strategies Austin shares.**

For anyone who’s willing to stand out and ensure a guaranteed offer at your dream company, CC is where you’ve got to be!!

SIMRAN

Senior Associate, Mettl

Thanks to Austin and the Cultivated Culture community, I'm now a staffing manager at Randstad. I've been a dedicated follower of Austin's content the last year and it has been a crucial part to the success of my job search. In my case, I was stepping into not only a new job but a new career. I am grateful for all of the content he provides. I can tell you, whatever effort you put in with his guidance you will get back ten times over. **If you're ready to put the work in IT WILL PAY OFF!**

One year ago I was receiving offers for roles that weren't truly aligned with what I wanted to do and for 30% less than my current salary. I didn't take them and kept moving forward, learning the whole way. Even with the pandemic I am better off this year than I would have been a year ago taking one of those offers. I am in a role I love with a company that I am so thrilled to work for. I can say with confidence I wouldn't have been as successful without him!

ELLEN

Staffing Manager

I believe most of the contents in DJS are insightful, but the VVP section is most valuable to me.

I had dozens of interviews but I didn't perform well. One of the reasons is probably because I am not a native English speaker. To navigate this situation I know I have to work harder but I don't know how to do it right. Austin's VVP tutorial is really enlightening, showing me specific steps to create value for the employer.

Additionally, the high-quality VVP examples are excellent references. In a nutshell, **I created a VVP for my target company and successfully obtained a job offer.** Thank you again for creating the DJS course!

BEN

Data Scientist

I wanted to write about my success story today and how Dream Job System and Austin were a big part of it!

Back in April 2020, I was a new Chemical Engineering graduate during the pandemic. I wanted to do a career pivot into tech but I had no "real" experience and a non-tech background coming out of university. I didn't know what I wanted to do, how and if it was even possible. For many months I was stressed, overwhelmed, anxious, hopeless, and had no idea of what to do in the future. I aimlessly and desperately applied to ~30 Chemical Engineering jobs before I hit a major burn out. I had to make a decision on a life change now because I couldn't continue on like that. I told myself the pivot into tech that I was dreaming about had to happen now or never.

I came across Dream Job System in September 2020 and invested in it because the testimonials blew me away and I wanted to learn about his approach of creating a Value Validation Project (VVP). Before that, I would always read Austin's tips and strategies in his articles – I loved how practical, and refreshing his advice was from all the other ones I saw.

For me personally, DJS was helpful because it gave me a clear outline and resources for the whole job hunting process. When I was doing it on my own I was overwhelmed with all of the resources online and didn't have direction and guidance until DJS. Following his course, I had the most success learning how to network properly (with his cold emails and outreach strategies) – it helped me explore different fields, nail down my passion & define my career goals, meet new people, expand my network with some people who are friends now, and ultimately, landed me my first interview. It also helped me prep for my interview and do salary negotiations even as a new grad with no experience.

I'm happy to say that DJS and Austin played a big part in me landing my first dream role in tech at one of my target companies! I always

recommend Austin to my friends who are also job hunting.

Before I connected with Cultivated Culture, my assumption was that applying for a job simply meant filling out an online application, hitting submit, and crossing my fingers – hoping for a reply. When my wife first told me about Austin, I was skeptical – but I was feeling stuck in a grinding job search, facing one rejection after the next.

I am by no means a poster-child for Austin's Cultivated Culture strategy. I certainly took some detours, took some risks, and tried out different things. However, despite my blended approach to ultimately landing the dream job, I found that the strategies, resources and tips that Austin offered were invaluable in my search! I quickly discovered the power of making strong connections, as well as seeking out informational interviews.

After continuing to build an arsenal of connections through Austin's "Quick Question" email approach, my patience and persistence finally paid off. **Within the same month, I received an offer for an incredible job, as well as landed two potential coaching/consulting roles in an entirely new career field!** Ultimately, I still had to do the heavy lifting – but Austin's strategies and templates provided the guidance I needed to get the ball rolling.

GIVING BACK WITH DJS

Giving back is a huge part of the Cultivated Culture philosophy.

Taking action is a fundamental part of my nature and the lessons I teach at Cultivated Culture. I'm a big believer in action that goes beyond ourselves, that has an impact on neighbors, our communities, and the rest of the world.

Cultivated Culture specifically focuses on two initiatives: Climate Change and Mental Health for Men.

For every purchase of the Dream Job System course, we make a donation to help remove 1/3 of a ton of carbon dioxide equivalents from the atmosphere and to plant one tree. In addition, I donate 1.5% of Cultivated Culture's gross profits to the following organizations:

While planting trees isn't the most effective form of capturing carbon and making progress, it's still a vital part of our ecosystem. I contribute to the **The National Forest Foundation** and their mission to conserve, restore, and sustain our national forests and grasslands. To date, Cultivated Culture has helped the NFF plant over 2,000 trees 🌲.

Movember is an organization focused on preventing men from dying early. Movember focuses on a range of issues from mental to physical health. The goal is to reduce male suicide rates 25% by 2030 and I'm working to help them ; there!

Tradewater focuses on finding and destroying refrigerants and other gases that have warming potentials up to 10,000 times stronger than carbon dioxide. Tradewater locates sources of these gases, purchases them, and safely destroys them. This is a highly efficient method with immediate impact. Cultivated Culture's contributions help remove ~60 tons of CO2 equivalents from the atmosphere every year. **Climeworks** is a direct air capture technology that effectively "captures" carbon from the air and safely stores it for later use as a raw material. Direct air capture is still in early stages as a technology, so it's not the most efficient way to capturing carbon. Our contributions help remove a modest ~560 lbs of carbon from the atmosphere every year. That said, the field has a lot of potential! This is a longer term play. I hope our contributions help make a small impact in progressing that technology to help increase its efficiency and effectiveness.
